Location: India | Open to Global Opportunities

PROFESSIONAL SUMMARY

Application-focused engineer with a Master's degree in Control Systems and hands-on experience in MATLAB-based modeling, simulation, and technical problem solving. Proven ability to support complex technical issues, collaborate across departments, and communicate technical concepts clearly. Motivated to deepen expertise in MathWorks products while contributing to customer success and continuous improvement initiatives.

CORE SKILLS

MATLAB & Simulink Application Support | Technical Troubleshooting | Model-Based Design | Cross-Functional Collaboration | Technical Documentation | Process Improvement | Leadership & Mentoring

TECHNICAL SKILLS

MATLAB, Simulink, Control Systems (PID, Classical Control), PLC Automation, C (Basic), C++ (Basic), Testing & Validation Concepts, AUTOCAD, ETAP basic and advanced.

PROJECT EXPERIENCE

MATLAB-Based Control Systems Projects
Developed, debugged, and optimized MATLAB models for control system analysis
Investigated simulation issues and proposed structured solutions
Explained model workflows and results to peers and faculty
Automatic Storage and Retrieval System (ASRS)
Designed and tested PLC control logic for automated systems
Assisted in troubleshooting system-level issues during validation
Documented issues and resolutions for knowledge sharing
AUTOCAD Electrical projects on substation

INTERNSHIP EXPERIENCE

Engineering Intern – Neyveli Lignite Corporation (NLC)
Supported system analysis and identification of corrective actions
Engineering Intern – Bharat Sanchar Nigam Limited (BSNL)
Assisted with testing, troubleshooting, and technical documentation

EDUCATION

M.E. Control Systems – PSG College of Technology (2019–2021) | CGPA: 7.0
